

QBazaar

Full Page Scripts, Page Analysis, Short Descriptions, User Stories & Backend Outputs

Website, Mobile App, Admin Dashboard, Marketplace Flows, MVP / Phase 2 Scope

Prepared for: Backend, Frontend, Mobile, QA, UI/UX and Product teams

Project market: Qatar only | Currency: QAR | Languages: Arabic + English

1. Document Purpose

This document defines the full page-level scope for QBazaar, a Qatar-only classified marketplace inspired by the classified ads model, while maintaining an independent brand, user experience, and implementation. It is intended as a practical implementation guide for backend, frontend, mobile, QA and product teams.

2. Global Product Rules

- Platform name: QBazaar.
- Market: Qatar only.
- Currency: QAR only.
- Languages: Arabic and English. Arabic must support RTL; English must support LTR.
- Main users: guest, registered buyer/seller, private seller, business seller, moderator, admin, super admin.
- Core MVP transaction model: users communicate and agree manually through chat; safe payment is Phase 2 unless selected for launch.
- All public pages must be responsive, SEO-friendly and optimized for mobile first.
- All sensitive admin actions must be permission-protected and audit-logged.

3. Core Marketplace Flow

1. User opens QBazaar and searches or browses by category.
2. User opens an ad details page.
3. User contacts seller through chat.
4. Buyer and seller negotiate manually or through structured offers.
5. Seller marks item as sold, reserved, expired, or deletes the ad.
6. Users can report suspicious ads, users or conversations.
7. Admin/moderator reviews ads, reports and user abuse cases.

4. Website & User Page Specifications

4.1 Home Page

URL	/
Phase	MVP
Short Description	Main entry point where users search, browse categories, see featured/latest ads and start posting.
Page Goal	Help users quickly find products/services or start selling.

Page Script / Content Structure

- Header: logo, search, location selector, language switcher, login/register, messages/favorites icons, Post Ad button.
- Hero: Find anything in Qatar. Buy, sell, rent, or offer services locally.
- Search block: keyword, category, location, min/max price.
- Category grid, featured ads, latest ads, safety tips, app download, footer.

Backend Requirements

- GET /categories/main
- GET /locations/qatar
- GET /ads/featured
- GET /ads/latest
- GET /settings/homepage

User Stories

- US-HOME-001 Browse home as guest.
- US-HOME-002 Search from home.
- US-HOME-003 Start posting an ad.

Acceptance Criteria

- Page loads without login.
- Search redirects to results with filters.
- Post Ad redirects guest to login or logged-in user to post flow.

4.2 Category Listing Page

URL	/categories
Phase	MVP
Short Description	Displays all main categories and subcategories.
Page Goal	Allow users to explore the marketplace by category.

Page Script / Content Structure

- Title: Browse Categories / تصفح الأقسام.
- Cards: icon, name, active ad count, subcategory preview.
- Examples: Cars, Real Estate, Electronics, Furniture, Jobs, Services, Fashion, Free Stuff.

Backend Requirements

- GET /categories/tree
- GET /categories/{slug}/stats

User Stories

- US-CAT-001 View all active categories.
- US-CAT-002 Open category page.

Acceptance Criteria

- Disabled categories are hidden.
- URLs are SEO-friendly.

4.3 Category Detail Page

URL	/category/{category-slug}
Phase	MVP
Short Description	Shows ads inside a selected category with category-specific filters.
Page Goal	Help users browse relevant listings within one category.

Page Script / Content Structure

- Breadcrumb, title, subcategory filters, location, price, condition, seller type, sort options.
- Category-specific fields: cars brand/model/year/mileage; real estate bedrooms/furnished; electronics brand/warranty.

Backend Requirements

- GET /ads?category={id}
- GET /categories/{id}/filters
- GET /locations/qatar

User Stories

- US-CATDETAIL-001 Browse category ads.
- US-CATDETAIL-002 Use category-specific filters.

Acceptance Criteria

- Results belong to selected category.
- Filters update results and support pagination.

4.4 Search Results Page

URL	/search?q={keyword}
Phase	MVP

Short Description	Displays keyword and filter-based search results.
Page Goal	Provide fast, accurate, filterable search.

Page Script / Content Structure

- Top search area: keyword, location, category.
- Filter panel: category, location, price, condition, seller type, date posted, delivery.
- Results area: count, sort, grid/list, cards, pagination/infinite scroll.
- Empty state: No ads found.

Backend Requirements

- GET /search
- GET /filters
- POST /saved-searches

User Stories

- US-SEARCH-001 Keyword search.
- US-SEARCH-002 Filter results.
- US-SEARCH-003 Save search.

Acceptance Criteria

- Supports Arabic and English search.
- Selected filters are visible and clearable.

4.5 Ad Details Page

URL	/ad/{ad-id}/{slug}
Phase	MVP
Short Description	Shows full details of one ad and lets buyers contact the seller.
Page Goal	Convert ad views into conversations or offers.

Page Script / Content Structure

- Image gallery, title, price, location, posted date, ad ID, description, specs.
- Seller card: name, avatar, private/business badge, verified phone, member since.
- Actions: contact seller, make offer, favorite, share, report.
- Safety warning and similar ads.

Backend Requirements

- GET /ads/{id}
- POST /ads/{id}/view
- POST /favorites
- POST /reports
- POST /conversations
- GET /ads/{id}/similar

User Stories

- US-AD-001 View ad details.
- US-AD-002 Contact seller.
- US-AD-003 Report ad.

Acceptance Criteria

- Guest can view, but login is required to message/favorite/report fully.
- Conversation is linked to the ad.

4.6 Post Ad - Category Selection

URL	/post-ad/category
Phase	MVP
Short Description	First step where seller selects category/subcategory.
Page Goal	Ensure every ad is correctly categorized.

Page Script / Content Structure

- Title: What do you want to post?
- Main categories, subcategories, category search, continue button.

Backend Requirements

- GET /categories/tree

User Stories

- US-POST-001 Select category.

Acceptance Criteria

- Final subcategory is required.
- Continue is disabled until selected.

4.7 Post Ad - Ad Information

URL	/post-ad/details
Phase	MVP
Short Description	Seller enters title, description, price, condition, location and custom fields.
Page Goal	Collect enough information to create a useful listing.

Page Script / Content Structure

- Fields: title, description, price, price type, condition, location, contact preferences.
- Dynamic fields per category.
- Hints and validation messages.

Backend Requirements

- GET /categories/{id}/fields
- POST /ads/draft
- PUT /ads/draft/{id}

User Stories

- US-POST-002 Enter ad details.

Acceptance Criteria

- Required fields are validated.
- Price accepts QAR only.
- Dynamic category fields are stored.

4.8 Post Ad - Images

URL	/post-ad/images
Phase	MVP
Short Description	Seller uploads, reorders and deletes ad photos.
Page Goal	Improve listing quality and buyer trust.

Page Script / Content Structure

- Upload area, instructions, max 10 images, cover image, reorder, delete.
- Supported formats: JPG, PNG, WebP.

Backend Requirements

- POST /uploads/images
- DELETE /uploads/images/{id}
- PUT /ads/draft/{id}/images

User Stories

- US-POST-003 Upload images.

Acceptance Criteria

- Multiple upload works.
- Invalid file types are rejected.
- First image becomes cover.

4.9 Post Ad - Review & Publish

URL	/post-ad/review
Phase	MVP
Short Description	Seller reviews final ad before publishing.
Page Goal	Reduce mistakes and confirm publishing.

Page Script / Content Structure

- Ad preview card, full details summary, image summary, location, edit buttons, terms checkbox, publish.
- Success: submitted and pending review or active.

Backend Requirements

- GET /ads/draft/{id}
- POST /ads/{id}/publish

User Stories

- US-POST-004 Publish ad.

Acceptance Criteria

- Terms must be accepted.
- Status becomes pending or active based on moderation settings.

4.10 Ad Preview Page

URL	/post-ad/preview/{draft-id}
Phase	MVP
Short Description	Private preview exactly as public ad will appear.
Page Goal	Reduce wrong posts before publishing.

Page Script / Content Structure

- Full ad preview, image gallery preview, title, price, description, category, location, contact visibility.
- Back to edit and Publish buttons.

Backend Requirements

- GET /ads/draft/{id}/preview
- POST /ads/{id}/publish

User Stories

- US-PREVIEW-001 Preview ad before publishing.

Acceptance Criteria

- Seller can return to edit.
- Seller can publish from preview.

4.11 Edit Ad Flow

URL	/account/my-ads/{ad-id}/edit
Phase	MVP
Short Description	Allows seller to edit an existing ad.
Page Goal	Keep ads accurate and updated.

Page Script / Content Structure

- Edit title, description, price, condition, custom fields, location, contact preferences and images.

Backend Requirements

- GET /ads/{id}/edit
- PUT /ads/{id}
- POST /uploads/images
- DELETE /uploads/images/{id}

User Stories

- US-EDIT-001 Edit active ad.

Acceptance Criteria

- Only ad owner can edit.
- Fields that trigger moderation can move status to pending.

4.12 Login Page

URL	/login
Phase	MVP
Short Description	Allows existing users to access their account.
Page Goal	Authenticate users securely.

Page Script / Content Structure

- Email/phone, password, login, forgot password, register.
- Future: Google/Apple.
- Errors: invalid credentials, suspended account, verification required.

Backend Requirements

- POST /auth/login
- POST /auth/refresh
- POST /auth/logout

User Stories

- US-AUTH-001 Login.

Acceptance Criteria

- Valid credentials log in.
- Invalid credentials show error.
- Suspended account is blocked.

4.13 Register Page

URL	/register
Phase	MVP
Short Description	Allows new users to create accounts.
Page Goal	Create buyer/seller accounts.

Page Script / Content Structure

- Full name, email, phone, password, confirm password, account type, terms acceptance.

Backend Requirements

- POST /auth/register
- POST /auth/send-otp
- POST /auth/verify-phone

User Stories

- US-AUTH-002 Register.

Acceptance Criteria

- Email and phone are unique.
- Password rules enforced.
- Terms accepted.

4.14 OTP Verification Page

URL	/verify-phone
Phase	MVP
Short Description	Verifies phone number using OTP.
Page Goal	Increase trust and reduce fake accounts.

Page Script / Content Structure

- Enter verification code, verify, resend code, change phone number.

Backend Requirements

- POST /auth/verify-otp
- POST /auth/resend-otp

User Stories

- US-AUTH-003 Verify phone.

Acceptance Criteria

- Correct OTP verifies phone.
- Expired OTP shows error.
- Resend is rate-limited.

4.15 Forgot Password Page

URL	/forgot-password
Phase	MVP
Short Description	Allows account recovery.
Page Goal	Recover access securely.

Page Script / Content Structure

- Email/phone input, send reset link/code, reset password form.

Backend Requirements

- POST /auth/forgot-password
- POST /auth/reset-password

User Stories

- US-AUTH-004 Reset password.

Acceptance Criteria

- Reset token expires.
- New password follows rules.

4.16 Public User Profile

URL	/profile/{user-id}
Phase	MVP
Short Description	Shows public seller information and active ads.
Page Goal	Build trust between buyers and sellers.

Page Script / Content Structure

- Name, avatar, account type, verified badges, member since, location, active ads, report user.

Backend Requirements

- GET /users/{id}/public-profile
- GET /users/{id}/ads
- POST /reports/user

User Stories

- US-PROFILE-001 View seller profile.

Acceptance Criteria

- Public info visible.
- Private info hidden.
- Active ads listed.

4.17 My Account Dashboard

URL	/account
Phase	MVP
Short Description	Main logged-in user dashboard.
Page Goal	Give users quick access to their activity.

Page Script / Content Structure

- Cards: My Ads, Messages, Favorites, Saved Searches, Profile Settings, Verification.
- Stats: active ads, sold ads, unread messages, favorites.

Backend Requirements

- GET /account/summary

User Stories

- US-ACCOUNT-001 View account summary.

Acceptance Criteria

- User sees own stats and navigation.

4.18 My Ads Page

URL	/account/my-ads
Phase	MVP
Short Description	Allows sellers to manage their own ads.
Page Goal	Enable editing, deleting, renewing and marking ads sold.

Page Script / Content Structure

- Tabs: active, pending, rejected, sold, expired, drafts.
- Each card: image, title, price, status, views, favorites, messages, edit, delete, mark sold, promote.

Backend Requirements

- GET /account/ads
- PUT /ads/{id}
- DELETE /ads/{id}
- POST /ads/{id}/mark-sold
- POST /ads/{id}/renew

User Stories

- US-MYADS-001 Manage ads.

Acceptance Criteria

- Seller sees only own ads.
- Can edit/delete/mark sold.

4.19 Draft Ads Page

URL	/account/drafts
Phase	MVP
Short Description	Displays unfinished ads.
Page Goal	Allow sellers to continue incomplete listings later.

Page Script / Content Structure

- Draft list, continue draft, delete draft, last updated.

Backend Requirements

- GET /account/drafts
- DELETE /ads/draft/{id}

User Stories

- US-DRAFT-001 Continue draft ad.

Acceptance Criteria

- Drafts auto-save.
- User can continue or delete draft.

4.20 Favorites Page

URL	/account/favorites
Phase	MVP
Short Description	Displays ads saved by user.
Page Goal	Allow buyers to return to interesting ads.

Page Script / Content Structure

- Saved ad cards, remove favorite, sold/deleted state.

Backend Requirements

- GET /favorites
- POST /favorites
- DELETE /favorites/{ad_id}

User Stories

- US-FAV-001 View favorites.

Acceptance Criteria

- Saved ads displayed.
- User can remove favorite.

4.21 Saved Searches Page

URL	/account/saved-searches
Phase	MVP or Phase 2
Short Description	Displays saved searches and alert settings.
Page Goal	Allow users to return to frequent searches and receive alerts.

Page Script / Content Structure

- Saved search list, filters summary, alert toggle, edit, delete.

Backend Requirements

- GET /saved-searches
- POST /saved-searches
- PUT /saved-searches/{id}
- DELETE /saved-searches/{id}

User Stories

- US-SEVEDSEARCH-001 Manage saved searches.

Acceptance Criteria

- User can save, edit, delete and enable/disable alerts.

4.22 Recently Viewed Ads

URL	/account/recently-viewed
Phase	Phase 2
Short Description	Shows ads recently opened by user.
Page Goal	Help users return to listings they viewed before.

Page Script / Content Structure

- Recently viewed list sorted by most recent, clear history.

Backend Requirements

- GET /account/recently-viewed
- DELETE /account/recently-viewed

User Stories

- US-RECENT-001 View recently viewed ads.

Acceptance Criteria

- Inactive ads handled correctly.

4.23 Blocked Users Page

URL	/account/blocked-users
Phase	MVP
Short Description	Allows users to view and unblock blocked users.
Page Goal	Control who can contact the user.

Page Script / Content Structure

- Blocked users list, unblock action.

Backend Requirements

- GET /account/blocked-users
- POST /users/{id}/block
- DELETE /users/{id}/block

User Stories

- US-BLOCK-001 Manage blocked users.

Acceptance Criteria

- Blocked users cannot send messages.
- User can unblock.

4.24 Messages Inbox

URL	/messages
Phase	MVP
Short Description	Displays all conversations.
Page Goal	Allow users to manage buyer/seller conversations.

Page Script / Content Structure

- Conversation list, search conversations, unread filter.
- Items show ad image, title, other user, last message, timestamp, unread count.

Backend Requirements

- GET /conversations

User Stories

- US-MSG-001 View inbox.

Acceptance Criteria

- Sorted by latest message.
- Unread highlighted.

4.25 Chat Detail

URL	/messages/{conversation-id}
Phase	MVP
Short Description	Real-time chat between buyer and seller about a specific ad.
Page Goal	Allow safe communication and negotiation.

Page Script / Content Structure

- Header: ad title/image, other user, view ad.
- Message area: text, system messages, offers later, payment status later.
- Input: message, send, make offer, report, block.
- Safety banner against external payment links.

Backend Requirements

- GET /conversations/{id}
- GET /conversations/{id}/messages
- POST /conversations/{id}/messages
- WebSocket message:new
- WebSocket message:read
- POST /conversations/{id}/report
- POST /users/{id}/block

User Stories

- US-CHAT-001 Send message.
- US-CHAT-002 Report conversation.

Acceptance Criteria

- Messages appear instantly.
- Empty messages blocked.
- Reports link to conversation.

4.26 Make Offer Flow

URL	Ad detail modal or chat modal
Phase	MVP optional / Phase 2
Short Description	Allows buyer to send structured price offer.
Page Goal	Support negotiation in a structured way.

Page Script / Content Structure

- Buyer enters offer amount and optional message.
- Seller can accept, reject or counter.
- Offer appears in chat.

Acceptance Criteria

- User can download invoice.
- Payment status visible.

5. Admin Dashboard Page Specifications

5.1 Admin Login

URL	/admin/login
Phase	MVP
Short Description	Secure login for admins and moderators.

Backend Requirements

- POST /admin/auth/login
- POST /admin/auth/2fa/verify

User Stories

- US-ADMIN-AUTH-001 Admin login.

Acceptance Criteria

- Admin login separate from user login.
- 2FA can be required.
- Failed attempts rate-limited.

5.2 Admin Dashboard Overview

URL	/admin/dashboard
Phase	MVP
Short Description	Shows platform KPIs and operational alerts.

Backend Requirements

- GET /admin/dashboard/summary
- GET /admin/dashboard/charts

User Stories

- US-ADMIN-DASH-001 View KPIs.

Acceptance Criteria

- KPIs visible and updated regularly.

5.3 Admin User Management

URL	/admin/users
Phase	MVP
Short Description	Search, view, suspend, verify or delete users.

Backend Requirements

- GET /admin/users
- GET /admin/users/{id}
- PUT /admin/users/{id}/status

- PUT /admin/users/{id}/verify

User Stories

- US-ADMIN-USERS-001 Manage users.

Acceptance Criteria

- Admin can search/suspend users.
- Action is audit-logged.

5.4 Admin Ads Management

URL	/admin/ads
Phase	MVP
Short Description	Review, approve, reject, block or edit ad visibility.

Backend Requirements

- GET /admin/ads
- GET /admin/ads/{id}
- POST /admin/ads/{id}/approve
- POST /admin/ads/{id}/reject
- POST /admin/ads/{id}/block

User Stories

- US-ADMIN-ADS-001 Review ads.

Acceptance Criteria

- Rejection reason required.
- User notified.

5.5 Admin Reports Management

URL	/admin/reports
Phase	MVP
Short Description	Handle reports against ads, users and conversations.

Backend Requirements

- GET /admin/reports
- GET /admin/reports/{id}
- POST /admin/reports/{id}/resolve
- POST /admin/reports/{id}/dismiss

User Stories

- US-ADMIN-REPORTS-001 Resolve reports.

Acceptance Criteria

- Admin sees reason and target.
- Resolution logged.

5.6 Admin Category Management

URL	/admin/categories
Phase	MVP
Short Description	Manage categories and subcategories.

Backend Requirements

- GET /admin/categories
- POST /admin/categories
- PUT /admin/categories/{id}
- DELETE /admin/categories/{id}
- PUT /admin/categories/reorder

User Stories

- US-ADMIN-CAT-001 Manage categories.

Acceptance Criteria

- Arabic/English names supported.
- Active categories can be disabled.

5.7 Admin Location Management

URL	/admin/locations
Phase	MVP
Short Description	Manage Qatar locations and districts.

Backend Requirements

- GET /admin/locations
- POST /admin/locations
- PUT /admin/locations/{id}

User Stories

- US-ADMIN-LOC-001 Manage locations.

Acceptance Criteria

- Locations support Arabic/English and active/inactive.

5.8 Admin CMS Pages

URL	/admin/cms
Phase	MVP
Short Description	Edit static pages like Terms, Privacy, Safety and Help.

Backend Requirements

- GET /admin/cms/pages
- PUT /admin/cms/pages/{id}

User Stories

- US-ADMIN-CMS-001 Manage CMS pages.

Acceptance Criteria

- Arabic/English content editable.
- Changes versioned.

5.9 Admin Promotions Management

URL	/admin/promotions
Phase	Phase 2
Short Description	Manage featured ads and paid promotions.

Backend Requirements

- GET /admin/promotions
- POST /admin/promotions
- PUT /admin/promotions/{id}

User Stories

- US-ADMIN-PROMO-001 Manage promotions.

Acceptance Criteria

- Promotion has start/end date.

5.10 Admin Audit Logs

URL	/admin/audit-logs
Phase	MVP
Short Description	Shows admin and moderator actions.

Backend Requirements

- GET /admin/audit-logs

User Stories

- US-ADMIN-AUDIT-001 View audit logs.

Acceptance Criteria

- Sensitive actions logged.
- Logs cannot be edited by normal admins.

5.11 Admin Business Applications

URL	/admin/business-applications
Phase	MVP if business launches / Phase 2
Short Description	Review and approve business seller applications.

Backend Requirements

- GET /admin/business-applications
- GET /admin/business-applications/{id}
- POST /admin/business-applications/{id}/approve
- POST /admin/business-applications/{id}/reject

User Stories

- US-ADMIN-BIZAPP-001 Review business applications.

Acceptance Criteria

- Admin can view documents, approve/reject, and notify applicant.

5.12 Admin Payments / Transactions

URL	/admin/payments
Phase	Phase 2
Short Description	Monitor payments, refunds, disputes and payouts.

Backend Requirements

- GET /admin/payments
- GET /admin/transactions
- GET /admin/payouts
- POST /admin/refunds/{transaction-id}

User Stories

- US-ADMIN-PAY-001 Manage payments.

Acceptance Criteria

- Refund actions permission-protected and logged.

5.13 Admin Support Tickets

URL	/admin/support-tickets
Phase	MVP
Short Description	Manage user support requests.

Backend Requirements

- GET /admin/support-tickets
- GET /admin/support-tickets/{id}
- POST /admin/support-tickets/{id}/reply
- PUT /admin/support-tickets/{id}/status

User Stories

- US-ADMIN-SUPPORT-001 Manage support tickets.

Acceptance Criteria

- Support can view, reply and update ticket status.

5.14 Admin Moderation Rules

URL	/admin/moderation-rules
Phase	MVP
Short Description	Manage banned words, blocked items, suspicious links and auto rules.

Backend Requirements

- GET /admin/moderation-rules
- POST /admin/moderation-rules
- PUT /admin/moderation-rules/{id}
- DELETE /admin/moderation-rules/{id}

User Stories

- US-ADMIN-MODRULE-001 Manage moderation rules.

Acceptance Criteria

- Rules affect ad submission and chat safety checks.

5.15 Admin System Settings

URL	/admin/settings
Phase	MVP
Short Description	Configure global platform settings.

Backend Requirements

- GET /admin/settings
- PUT /admin/settings

User Stories

- US-ADMIN-SETTINGS-001 Manage system settings.

Acceptance Criteria

- Only super admin can update.
- Changes audited.

5.16 Admin Notification Templates

URL	/admin/notification-templates
Phase	MVP or Phase 2
Short Description	Manage Arabic/English SMS, email and push templates.

Backend Requirements

- GET /admin/notification-templates
- PUT /admin/notification-templates/{id}

User Stories

- US-ADMIN-TEMPLATE-001 Manage notification templates.

Acceptance Criteria

- Variables validated.
- Arabic and English supported.

6. Mobile App Screens

The mobile app should mirror the web platform while optimizing for camera upload, push notifications, deep links, mobile gestures and secure token storage.

6.1 Splash Screen

Phase	MVP
Short Description	Initial loading and app branding.
Expected Output	Shows logo, checks app version/session, routes to onboarding/home/login.

6.2 Onboarding - Language

Phase	MVP
Short Description	User chooses Arabic or English.
Expected Output	Stores language and applies RTL/LTR correctly.

6.3 Onboarding - Location

Phase	MVP
Short Description	User chooses Qatar location.
Expected Output	Sets default browsing location.

6.4 Onboarding - Notifications

Phase	MVP
Short Description	User allows or skips push notifications.
Expected Output	Stores preference and registers FCM/APNs token if allowed.

6.5 Mobile Home

Phase	MVP
Short Description	Mobile-optimized home page.
Expected Output	Search, categories, latest ads, featured ads and Post Ad CTA.

6.6 Mobile Search

Phase	MVP
Short Description	Mobile search and filters.
Expected Output	Filter sheet, sort, grid/list and infinite scroll.

6.7 Mobile Ad Details

Phase	MVP
Short Description	Mobile ad page.
Expected Output	Image swipe gallery, seller card, chat, favorite, report.

6.8 Mobile Post Ad Stepper

Phase	MVP
Short Description	Step-by-step mobile ad creation.
Expected Output	Category, details, camera/gallery images, review, publish.

6.9 Mobile Messages

Phase	MVP
Short Description	Inbox and chat.
Expected Output	Real-time messages, push notifications, report/block.

6.10 Mobile Account

Phase	MVP
Short Description	User dashboard and settings.
Expected Output	My ads, favorites, profile, verification, notifications.

6.11 Mobile Offline / No Internet

Phase	MVP
Short Description	No network state.
Expected Output	Shows retry and cached content where possible.

7. Required Backend Modules

Authentication Module

Register, login, logout, refresh token, forgot password, OTP verification, role management.

User Module

Profiles, public seller profile, account status, verification, business seller application.

Category Module

Category tree, custom filters, dynamic fields and sorting order.

Location Module

Qatar municipalities, districts, location search and localization.

Ads Module

Draft, publish, edit, delete, mark sold, renew, expire, view tracking.

Search Module

Keyword search, filters, sort, indexing, Arabic/English support.

Image Upload Module

Upload, compress, generate thumbnails, delete, scan and store metadata.

Messaging Module

Conversations, real-time chat, read receipts, block/report flow.

Favorites Module

Add, remove and list saved ads.

Offers Module

Make offer, accept, reject, counter, chat integration.

Reports Module

Report ad, user, conversation and admin review workflow.

Notification Module

In-app, push and later email/SMS notifications with preferences.

Admin Module

Admin auth, RBAC, user management, moderation, reports, CMS, audit logs.

CMS Module

Help, safety, terms, privacy and localized content.

Payments Module - Phase 2

Transactions, payment provider integration, webhooks, disputes, refunds, payouts.

Promotions Module - Phase 2

Featured ads, bump ads, top placement, packages and invoices.

8. Main API List

Public APIs

- GET /categories/tree
- GET /categories/main
- GET /locations/qatar
- GET /ads/latest
- GET /ads/featured
- GET /ads/{id}
- GET /ads/{id}/similar
- GET /search
- GET /cms/pages/{slug}

Auth APIs

- POST /auth/register
- POST /auth/login
- POST /auth/logout
- POST /auth/refresh
- POST /auth/send-otp
- POST /auth/verify-otp
- POST /auth/forgot-password
- POST /auth/reset-password

User APIs

- GET /account/summary
- GET /account/profile
- PUT /account/profile
- PUT /account/password
- GET /users/{id}/public-profile
- GET /account/verification-status
- GET /account/privacy-settings

Ads APIs

- POST /ads/draft
- PUT /ads/draft/{id}

- GET /ads/draft/{id}/preview
- POST /ads/{id}/publish
- PUT /ads/{id}
- DELETE /ads/{id}
- POST /ads/{id}/mark-sold
- POST /ads/{id}/renew
- POST /ads/{id}/view

Uploads APIs

- POST /uploads/images
- DELETE /uploads/images/{id}
- POST /uploads/avatar
- POST /uploads/support-attachments
- POST /uploads/business-documents

Favorites APIs

- GET /favorites
- POST /favorites
- DELETE /favorites/{ad_id}

Messaging APIs

- GET /conversations
- POST /conversations
- GET /conversations/{id}
- GET /conversations/{id}/messages
- POST /conversations/{id}/messages

Reports APIs

- POST /reports/ad
- POST /reports/user
- POST /reports/conversation
- GET /account/reports

Notifications APIs

- GET /notifications
- PUT /notifications/{id}/read
- PUT /notifications/read-all
- GET /account/notification-preferences
- PUT /account/notification-preferences

Business APIs

- POST /business/applications
- GET /business/dashboard/summary
- GET /business/ads
- GET /stores/{slug}
- GET /stores/{slug}/ads

Payment APIs - Phase 2

- POST /transactions
- GET /transactions/{id}
- GET /account/transactions
- POST /payments/initiate
- POST /payments/webhook
- POST /transactions/{id}/dispute
- GET /account/disputes

Admin APIs

- POST /admin/auth/login
- GET /admin/dashboard/summary
- GET /admin/users
- GET /admin/ads
- POST /admin/ads/{id}/approve
- POST /admin/ads/{id}/reject
- GET /admin/reports
- POST /admin/reports/{id}/resolve
- GET /admin/categories
- POST /admin/categories
- PUT /admin/categories/{id}
- GET /admin/audit-logs
- GET /admin/settings
- PUT /admin/settings

9. Backend Output Required Per Page

- API endpoint
- Request schema
- Response schema
- Error codes
- Authorization rules
- Validation rules
- Pagination rules for list pages
- Sorting rules for list pages
- Audit log rules for sensitive actions
- Notification triggers
- Localization keys where text is backend/CMS-driven

10. Priority Matrix

MVP Must Have	Home, categories, search, ad details, post/edit/preview ad, login/register, OTP, my ads, drafts, favorites, messages, chat, profile, verification, reports, notification preferences, support, admin moderation, Qatar locations, Arabic/English.
MVP Optional / Depends on Client	Make offer, saved searches, business seller registration, notification templates.
Phase 2	Safe payment, delivery addresses, orders/transactions, disputes, promotions checkout, billing/invoices, business dashboard/storefront, recently viewed, advanced saved search alerts.
Phase 3	AI moderation, AI recommendations, map search, advanced analytics, vendor storefront enhancements, escrow/dispute automation.

11. QA Checklist Per Page

- Arabic RTL layout
- English LTR layout
- Mobile responsive layout
- Empty state
- Loading state
- Error state
- Authorization state
- Validation errors
- API failure
- Slow network
- Image handling

- Security permissions
- SEO metadata for public pages
- Accessibility basics
- No broken links
- No private data exposure

12. Suggested Milestones

Milestone 1 - Discovery & Final Scope

Confirm MVP categories, moderation rules, payment phase, vendor model, legal requirements and final backlog.

Milestone 2 - UX/UI

Web, mobile and admin wireframes; Arabic/English design system; clickable prototype.

Milestone 3 - Backend Foundation

Auth, users, categories, locations, ads, uploads, RBAC and audit base.

Milestone 4 - Marketplace MVP

Home, search, category, ad details, post/edit ad, my ads, drafts, favorites.

Milestone 5 - Messaging & Notifications

Conversations, WebSocket chat, push notifications, reports, block user.

Milestone 6 - Admin Dashboard

Users, ads moderation, reports, categories, locations, CMS, support tickets, audit logs.

Milestone 7 - QA & Launch

Testing, security review, performance optimization, UAT, production deployment, app store submission.

Milestone 8 - Monetization & Phase 2

Promotions, business packages, safe payment, delivery, ratings and disputes.

13. Final Backend Delivery Expectation

- Database schema and ERD.
- REST API documentation with request/response examples.
- Authentication and authorization flow.
- Admin RBAC matrix.
- Search implementation plan and indexing rules.
- File upload service with image compression and thumbnails.
- Chat WebSocket service.
- Notification system.
- Moderation workflow and rule engine.
- Audit log system.
- CMS system.
- Deployment-ready environment configuration.
- Monitoring and error logging.
